## SEWAGE DISPOSAL SYSTEM

- In order to prevent the out break of epidemic diseases we have conducted awareness programmes like lecturing, advertisement on notice boards, displaying of information's, slogan boards etc. for faculty and students in our campus we have constructed the sewer appurtenances in arranged manner for effective disposal of the sewage from different sections of our institution.
- We have arranged two systems one is purely carrying storm water drainage through open drains and another is sewage coming from toilets is conveyed through conshild pipe lines.
- This separate system is diverted through inspection chamber which is established where there is a change of alignment and is placed at the side of bituminous roads.

- Sewage is effectively passed through the IC and finally it is intruded with main sewer lines for further effective treatment.
- Thus we have maintained the water carriage system of our entire campus without causing any nuisance to the public and environment.

Certified that , The K H Kabbur Institute of Engineering has the required sewage disposal system .

The above document is available on the institution website
